DAY 2: AMBOSELI NATIONAL PARK

An occasionally bumpy ride to Amboseli National Park on the border with Tanzania begins your exploration of Kenya. Mount Kilimanjaro provides a dramatic backdrop to Amboseli as it rises almost 20,000 feet above the plain and the concentration of wildlife drawn to the park in the dry season. Amboseli boasts a variety of ecosystems – marshland, scrubby plain, acacia woodlands – supporting a diverse range of wildlife. Following lunch, you'll spend the afternoon viewing some of this diversity, notably the park's elephants, which are numerous, and giraffes, and predators including lions and cheetahs.

DAY 3: AMBOSELI NATIONAL PARK

Day Three features morning and afternoon game drives over the park's dusty roads (some of these are impassable during the rainy season due to the ashy soil), and you're likely to spot wildebeest and zebra attracted to the marshes and swamps fed by the melting snows of Kilimanjaro. You may also spot white rhinos on the fringes of the marshes as well as a great variety of birdlife (some 425 species of bird populate the park).

With Kilimanjaro providing a dramatic backdrop, your photographs will be stunning. East Africa game avoids the mid-day heat by dozing in the shade. You can avoid the mid-day heat in the lodge's pool, at the bar, or like the beasts of the savannah, with a nap in the shade.

This is the ultimate ornithologist's paradise with over 450 species of birds. Apart from its thousands and sometimes millions of flamingos nesting along the shores, the surface of the shallow lake is often hard to recognize due to the continually shifting mass of pink. The number of flamingoes on the lake varies with water and food conditions and the best vantage point is from Baboon Cliff. Lake Nakuru houses Kenya's first rhino sanctuary and one of the largest concentrations of black rhinoceros in the world a large population of white rhino. The park features the picturesque Malaika Waterfalls. Also of interest is an area of 188 km around the lake fenced off as a sanctuary to protect Rothschild giraffes. Among predators are lion, leopard and large pythons hiding in the dense woodlands which may occasionally be seen crossing roads or dangling from trees. Others game include Thomson's and Grant gazelle, the long- eared leaf-nosed bat, colobus monkey, rock hyrax, hippo, and waterbuck; Impala, striped hyena, bat-eared fox, wildcat, reedbuck and golden cat.

When westerners think of Africa and safari, this is place they imagine - golden grassland plains pocked with acacia, wildebeests, zebras, lions, and jackals bound together by the cycle of life and death.
